SERION Immunomat

The SERION Immunomat is a 4-plate benchtop automat with integrated pipetting system, plate transporter, ELISA washer and reader. Four plate positions and incubators with agitation function guarantee an efficient workload of the instrument allowing the processing of four microtiter plates. Of course, the system is in compliance with the *in vitro* diagnostic directive 98/79/EC.

Fully automated ELISA Analyzer

SERION Immunomat includes a barcode identification system for racks, reagents and microtiter plates and allows the processing of up to 16 different assays per plate. The easy access to buffers and reagents, level sensors for all fluid containers and a software-controlled tip management system guarantee customer convenient handling. SERION Immunomat is validated for different applications using SERION ELISA immunoassays.

SERION Immunomat Software

SERION Immunomat software allows the generation of assay protocols, panel definitions and worklists for routine diagnostics. Connection to laboratory software systems is possible via the bidirectional ASTM interface. Evaluation of SERION ELISA *classic* tests is carried out fast and conveniently using the SERION Immunomat software.
